COSC 494/594 Bioinformatics Computing

Challenge #5

| 1. | Use the brute-force algorithm in lecture 12 to build a suffix tree of the string "BANANA" |
|----|---|
| | |
| | |
| | |
| 2. | Also based on the final slide of lecture 12/13, turn the above suffix tree above into a suffix array and also provide the corresponding LCP array |
| | |
| | |
| 3. | Generate a random DNA string of size 8-10 characters. What are the suffixes and |
| | produce the suffix array and LCP array for your group-derived sequence. |
